

## WAIVER REQUEST EXHIBIT

This waiver request is being attached to the subject application, and the application is shown as requesting a waiver to address a technical problem with the filing. Applicants consummated the transaction described herein on December 31, 2008, and are filing this forbearance notification on January 30, 2009, as required under the rules. Nonetheless, the electronic processing system states that "If the Forbearance Date is more than 30 days prior to the receipt date of this application a Waiver request is required. Please try again." Applicants have called FCC Technical Support (assigned case number 1141263), and no apparent resolution to the problem exists that would permit the filing to occur timely under the rules in the absence of indicating a waiver is requested and attaching a waiver exhibit. Under the circumstances, applicants have indicated a waiver is requested and attached this exhibit, even though this filing is timely under the rules and no waiver is necessary.
